

AKASH P. T

Full Stack Developer | Chennai, India | +91 8939457936 | akashakash4575@gmail.com

LinkedIn: linkedin.com/in/akashpt | GitHub: github.com/akashpt | Portfolio: akashpt.github.io

Professional Summary

Full Stack Developer experienced in designing scalable, secure, and responsive web applications using Python, Django, Flask, React.js, JavaScript, REST APIs, MySQL, AWS, Docker, CI/CD pipelines, and Linux. Proficient in frontend engineering, backend API development, database optimization, cloud deployment, JWT authentication, unit testing, and Agile delivery. Strong foundation in data structures, object-oriented programming, problem-solving, and application performance tuning.

Technical Skills

Programming Languages: Python, JavaScript ES6+

Frontend Technologies: React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design, Reusable Components

Backend Technologies: Django, Flask, REST API Development, MVC Architecture, CRUD Operations, API Integration, JWT Authentication

Databases: MySQL, Relational Database Design, SQL Query Optimization

Cloud and DevOps: AWS EC2, AWS S3, AWS RDS, Docker, GitHub Actions, CI/CD Pipelines, Linux

Tools and Methodologies: Git, GitHub, VS Code, Postman, Agile, Scrum, Unit Testing

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, Secure Application Development, Performance Optimization

Internship Experience

Web Developer Intern | Rasa AI Analytics and Science, Chennai | May 2025 – July 2025

- Delivered a full-stack web application with React.js and Django, enhancing application performance and user experience by 30%.
- Created 10+ reusable frontend components and scalable backend APIs, lowering development effort by 20%.
- Configured CI/CD workflows with GitHub Actions, cutting deployment time by 40%.
- Integrated RESTful APIs to accelerate data retrieval speed by 25%.
- Authored unit tests for REST endpoints, achieving 85% code coverage.
- Validated API request-response flows in Postman, minimizing integration issues by 25%.
- Contributed to Agile development cycles, supporting iterative feature releases and production-ready delivery.

Projects

AI Image and Video Comic Generator | Dec 2025 – May 2026

Technologies used: Python, Flask, React.js, MoviePy

- Architected a full-stack AI application that converts text prompts into comic-style images and videos, increasing content generation efficiency by 30%.
- Implemented responsive React.js interfaces and Python Flask APIs to support efficient data processing and seamless system integration.
- Leveraged MoviePy to automate video creation workflows and streamline multimedia content production.
- Applied prompt engineering techniques to improve AI output quality, relevance, and accuracy.

Cloud-Based Banking Management System | Dec 2024 – May 2025

Technologies used: React.js, Python, AWS EC2, AWS RDS, MySQL, JWT

- Built a scalable banking platform with interactive React.js dashboards, increasing usability and application performance by 25%.
- Hosted the application on AWS EC2 and managed relational databases with AWS RDS to support availability and reliability.
- Structured relational database schemas and tuned SQL queries, reducing query execution time by 20%.
- Secured API endpoints through JWT authentication and improved access control across the application.

Education

Bachelor of Engineering in Computer Science and Engineering

Sriram Engineering College, Chennai | Aug 2022 – May 2026 | CGPA: 8.0 / 10

Certifications

- Deep Learning using TensorFlow and Python
- Generative AI Workshop
- AI and Machine Learning Certification

Soft Skills

Problem Solving | Analytical Thinking | Team Collaboration | Communication | Adaptability

Languages

Malayalam: Native | Tamil: Fluent | English: Professional Working Proficiency
